

MAGNETIC DESTONER

We Regal Magnetics are one of the leading suppliers of magnetic Destoner in all over India. Our magnetic Destoner are specially designed for removing mud balls & other iron impurities which can be found in wheat, dall, urad dall, makka, soya bean, and many commodities where we can use this High Intensity Magnetic Destoner.

Magnetic Destoner Are Very Good at performance for removing mud balls, we can gain the 100% accuracy after passing material on Magnetic De Stoner.

This Magnetic de-stoner have Gauss Value of up to 13000 which is very helpful to remove mud balls & iron impurities.

We have wide range of Magnetic De-stoner starting from 1 TPH to 5 TPH capacities. Power consumption of this magnetic Destoner is only up to 1.5 hp. Magnetic De-stoner are Totally Closed Body To avoid Dusting & noise pollution and also Movable from One Place to another.

Features

- Easy To Operate
- Auto Cleaning
- Low power Consumption
- Affordable cost
- Long life performance
- Easy to move

DRAWER MAGNET

Our Drawer Magnets are perfectly suited for collecting and separating contaminant ferrous metal from gravity fed, dry, free flowing materials. Housed inside are the extremely strong Neodymium Rare Earth Magnets which do the capturing and holding of the tiny pieces of ferrous metal contaminant. Made specifically for the flour mills, dall mills, agro industry, chemical industry, plastics industry, that features temperature-compensated rare earth magnets. With that benefit on board, they are compatible with high temperature (up to 80°C) machines like extrusion, injection and blow molding machines while still maintaining a maximum pulling power. Guaranteeing a level of durability and a reduction in downtime, this particularly impressive series of drawer magnets has been a leader in the industry.

Features

- Patented "No Spill" Slide Gate, completely shuts off product flow for safe and clean removal of the drawer for cleaning.
- Flanges customized to customers own needs, for fast simple fitting.

DRUM TYPE MAGNETIC SEPARATOR

Our magnetic drum separator is very useful for removing iron impurities like nuts, bolts, heavy mild steel parts. Magnetic drum separators can be used in plastic industries, foundry, and many more industries where we can protect iron impurities from our processing plant to protect the other machineries. Drum separators are comes in ferrite & rare earth segments

Features

- Easy to clean
- Long life performance
- Affordable Cost

HOPPER MAGNET

We regal Magnetics are manufacturer of all types of Hopper Magnets and also a leading manufacturer & supplier all over India.

Hopper magnets are used in flour mills, dall mills, plastic industry, pharmaceutical industry, and chemical industry. Hopper magnet can be fixed easily anywhere where material is passing. Hopper magnets can be made of ferrite magnet & high intensity rare earth magnets.

ferrite hopper have gauss value of up to 2500 gauss and rare earth hopper magnet have gauss value of up to 10000.

There are many sizes in square and round is available in hopper magnet.

ROD MAGNET

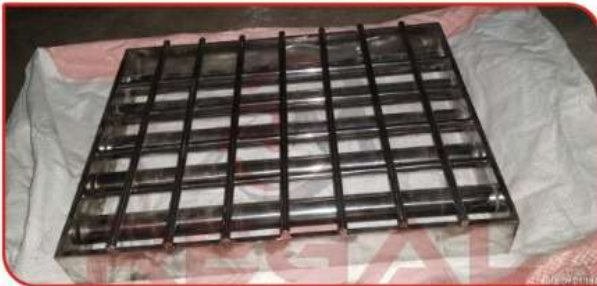

Our magnetic rod/tube are as simple and affordable cost for separation of iron impurities. This magnetic rods are used many industries like food, plastic, chemical, agro industries for removing iron impurities.

Magnetic rods are comes in 25mm dia & 27mm dia and length is minimum from 6". This rod are comes in ferrite & rare earth segment .

Features

- Easy to clean
- Long life
- Effective performance

OUR OTHER PRODUCTS

Manufacturer & Exporter of All type of Magnetic Equipments & Vibro Screens

55, Abhishilp Estate, B/h. Gujarat Vahepari Maha Mandal,
Nr. Odhav Ring Road, Ahmedabad-382415.
